## THE WORLD OVER

Hudson Bay Port Soon Opens

Prince Wales Saves Boys Life

Germany Not to Start Fight

Drought Destroys All Hopes

The position at noon on Monday, August 6th, of three boats, the first of this season, toward bound for Churchill was given by the radio branch of the department of Marine, as follows: The SS Talworth was 42 miles east of Resolution, the SS Brandon 42 miles east of Resolution and the Rio Claro 45 miles east of Resolution.

**HAIRIETZ, France**—The Prince of Wales saved a small boy from drowning Sunday by hauling him from the grip of a huge wave which swept the youngster ashore. The Prince was bathing at the beach when he heard a scream and saw the 12-year-old boy suddenly swept away by the comb. Immediately plunging after the Prince, the child clutched the boy and swam back to the beach.

**LONDON**—The London Mail quoted Chancellor Rieu in saying in an interview in Berlin, "Believe me we shall never fight again except in self defense. If it rests with Germany war will not come again. This country has a more profound impression than any other of the evils war causes."

Questioned on the Austrian situation the Chancellor said, "We shall not attack Austria but we cannot prevent Austria seeking to restore their ancient connection with Germany. Unless Britain attacks us, we shall never come into conflict with Britain on the Rhine or anywhere else. We want nothing from Britain," he said.

**CHICAGO**—Farmers of Iowa, Wisconsin and Illinois scanned the skies anxiously for signs of rain, but not

## PROSPECTIVE CANADIAN WHEAT SUPPLIES FOR YEAR

It is quite possible that Canada will have 40 million bushels of wheat that will be available for domestic consumption, seed and feed and export and carryover during the next twelve months. Allowing 116 million bushels for domestic consumption, seed and feed, and 245 million bushels (Canada's quota under the international agreement) for export, the carryover should be reduced to 75 million bushels by August 1st, 1935. Of course if the world demand results in larger shipments from Canada than the 245 million bushels the Canadian carryover will be just that much smaller. The United States will not be able to fill her quota for exports during the coming year and Canada may be effected a percentage of that amount.

## WHITE GOPHER CAUGHT NEAR IRRICANA VILLAGE

An oddity of the animal world, a white gopher, was caught here recently by Alex Hewitt with a snare in a hayfield near Irricana. It is pure white with the exception of the ears, which are of an orange hue, but the eyes instead of being black as in the case of most gophers, are blue.

Heavy aluminum frying pans or griddles will clean up grease and oil, leaving them as a result of heat and summer-flood what is in favorable condition, but stable wheat and corn generally have been fairly good. Pastures are driving up.

**Southeastern Alberta**—Cutting has commenced with the average yield 18 bushels.

**Western Alberta**—Crops are generally satisfactory but dry weather has lowered the yield prospects. Pastures are growing rapidly. Pastures and hay crops are good.

**Southern Saskatchewan**—Yields of all grains will be poor and in extensive sections crops will be complete failures. Owing to drought and to the farmers inability to finance the running of their tractors and feed shortage leaving houses in poor condition, summer-flood operations have been seriously curtailed. Pastures and fodder crops are very poor, and the movement of livestock to northern areas continues.

**Northwestern Saskatchewan**—Conditions are fairly satisfactory although rain is needed in some districts. Pastures and hay crops are good.

## Bank of Montreal Crop Report on August 2nd.

**General**—In the prairie provinces a few scattered showers during the past week have afforded some relief but all crops have suffered further deterioration from the continued drought particularly in the southern half of Saskatchewan, southern Manitoba and east central areas of Alberta. Grains are ripening rapidly and cutting has commenced in southern districts. In Quebec, while the soil has been drying rapidly, light rain falls early in the week were beneficial. Crops generally are in a fairly satisfactory condition. In Ontario the weather of the past week has been quite warm and while heavy showers in some areas have been of benefit more moisture is urgently needed in most localities particularly in the southwestern section of the province where protracted drought is accentuating the dryness. In the Maritime Provinces rainfall has been general with beneficial effect. In British Columbia weather conditions generally have been favorable and crops continue to mature two or three weeks earlier than usual.

**Northeastern Alberta**—Crops continue to deteriorate as a result of heat and summer-flood what is in favorable condition, but stable wheat and corn generally have been fairly good. Pastures are driving up.

**Southeastern Alberta**—Cutting has commenced with the average yield 18 bushels.

**Western Alberta**—Crops are generally satisfactory but dry weather has lowered the yield prospects. Pastures are growing rapidly. Pastures and hay crops are good.

**Southern Saskatchewan**—Yields of all grains will be poor and in extensive sections crops will be complete failures. Owing to drought and to the farmers inability to finance the running of their tractors and feed shortage leaving houses in poor condition, summer-flood operations have been seriously curtailed. Pastures and fodder crops are very poor, and the movement of livestock to northern areas continues.

**Northwestern Saskatchewan**—Conditions are fairly satisfactory although rain is needed in some districts. Pastures and hay crops are good.

## HOUSEHOLD HINTS

Sticky, soiled leather on furniture may be best cleaned by rubbing with a piece of cheesecloth moistened with banana oil and following it up with a clean soft cloth.

Keep bamboo furniture in good condition by going over it occasionally with equal parts of linseed oil and turpentine.

If you like your home ornaments clean and polished, rub them with a little furniture polish and wipe them clean with a dry cloth.

A decidedly attractive way of preparing baked potatoes is to combine them from the shell after cooking, mash them with butter, salt and pepper and add a well beaten yolk of egg. Then replace them in the half-shells and brown them in the oven. They taste better and they're much more easily handled at the table.

Even the most delicate fabric may be cleaned of ink-stains with a teaspoonful of lemon juice diluted in a glass of hot water. Soak the fabric a short while, pour over it with a brush dipped in a solution of chlorine and water and follow that with a few drops of ammonia solution.

## 1934-35 VOLUNTARY POOL

It has been decided to operate a voluntary pool for the coming season along similar lines to that of the past year, according to Wheat Pool officials and the Pool Member may decide for himself as to whether he wishes to deliver all or any portion of his wheat on the pooling basis or to market all or any portion of it on the open market. It has also been decided that no deductions will be made for elevator or commercial mill purposes, or for payment of any 1929 overpayment from the selling price of wheat delivered for pooling during the coming year, nor from proceeds of any grain marketed through Pool elevator facilities. The initial payment on deliveries of wheat to the 1934-35 pool has been set for the time being at the Bushels One Northern in store Vancouver.

## WORK STARTED ON BANK OF MONTREAL STRUCTURE

Workers commenced on August 1st to excavate the basement and put in the concrete foundation on which to house the new Bank of Montreal structure, which will be moved to Carbon shortly from Banff.

In order to avoid extra expense in the construction of the bank, the Bank of Montreal is having one of its vacant buildings moved to Carbon and we understand that the contract has been let to a Calgary firm. The contractors will have to move the two-story structure across the Red Deer river and over three creeks to get it to Carbon.

The site of the new bank building will be opposite the post office.

## Southern News

Mr. R. J. Oehlhauser made a trip to Calgary on Tuesday of this week.

Mr. and Mrs. Ed. Schell of Calgary spent the week with some of their relatives in the district.

Mr. John Oehlhauser Sr. and Miss Katie Kary returned to Calgary on Friday of last week.

Mr. and Mrs. Max Kary left for Cranbrook B.C. on Friday to visit with Mr. and Mrs. Mike Kary.

Mr. and Mrs. John Becker of Reims, Oregon, arrived last week and are visiting with Mrs. Becker's parents, Mr. and Mrs. John Glock, as well as with other relatives.

Mr. and Mrs. Sam Oehlhauser and children and Gilbert Berchak returned to Hanna last week and spent three days visiting with Mr. and Mrs. Rusty Neulauer.

Mr. and Mrs. R. Neulauer, Mr. and Mrs. E. Kary, and Mr. Mike Kary of Cranbrook spent the week with relatives in the district.

Mr. John Wits and Hilda were visiting with Mr. and Mrs. Joe Kary at Hammarika for a few days last week.

Mr. F. P. Oehlhauser returned home from Calgary after being confined to the hospital for a few days.

## EXPERT LAUDS WEEKLIES

One of the highest compliments ever paid the weekly newspapers of the country comes from an executive secretary of the Association of Alberta, Inc. Agnew, who delivered an address that the "country weeklies are the cornerstones of Canadian Journalism." The weekly in a small town talks to its readers more intimately and confidently than any other medium. This man said. Such a tribute from one of the leading advertising authorities is gratifying to the hundreds of country publishers, many of whom are struggling under adverse conditions to faithfully serve their communities. It should also impress town and small city merchants with the fact that the weekly papers often the most effective medium for placing his store message before the people upon whom he must depend for his business existence.

## Local News Items

Mrs. Joe Smith was in Calgary on Monday.

Mrs. G. G. Martin and Mr. and Mrs. Joe Smith and daughter returned to Glendon one day last week and brought home Russell, who has spent the last month there. His mother is in Glendon for a short visit.

Mr. and Mrs. E. J. Berchak and family have moved in one of the Oehlhauser houses on the "Island."

Miss Winifred Dixon is spending a few days vacation in Carbon.

## PUTTING UP THE WINDMILL

Charlie Martins were in trouble, as their neighbors gathered round. They had a real good wind mill but it was lying on the ground.

And when Ellen needed water Poor old Charlie had to jump: She couldn't get it up herself. It was so hard to pump.

It was just about eleven When Ellen said, "Don my word, Charlie are coming up by Haldane's in the little old Park."

There were Dave and Lee and Gordon All had wandered down that way. And they'd almost finished dinner. When along came young Jim Hay.

Now Charlie had been busy For some days in the past. So he had the "dead man" ready To hold the saw ropes fast.

The weather it was equally bright and sunny a little shower. But that was just to give the men A rest for half an hour.

Oh, they had a lot of trouble. Once they thought they'd have to quit "Woe" Charlie says, "We're finished here. This hole for six has split."

Leslie Bremner took one eye line. On the other was Jim Smith. And twice had to choose between them. They did their job so well.

Then all hands got on the pulley. And you never would believe. The way they pulled together. When Jim Hay yelled, "Heave."

At last they got it standing straight. And anchored firm and fast. When Ellen said, "Thank goodness. The windmill's up at last."

So then she shouted, "Supper!" And there's hungry it would seem. The way they finished up the dish Of strawberries and cream.

And when they were leaving To so their different way. "Oh, well, I thank you, folks. For what you did today."

Mrs. A.—Shall I ask the cook for reference? Mr. A.—No. Get her to submit samples. "No, Accented."

"I'll never ask another woman to marry me as long as I live." "What? Refused again?" "No, Accented."

An easy way to patch windows is to rub them with a chamomile dipped in a full strength or strong solution of rubbing alcohol.

## OCCASIONAL WIFE

By  
EDNA ROY WEBSTER  
Author of "Joretta," "Lipstick  
Girl" etc.

## SYNOPSIS

Camilla Hoyt and Peter Anson, young and in love, marry secretly, desiring to live their own lives apart until Peter is able to provide for her. Peter is a young, struggling artist, trying to win a competition for a scholarship abroad and Camilla is the adopted daughter of a wealthy family. She is not to inherit money when she comes of age and so is studying commercial art in the hope of finding an agency job. Others in the story are Avis Werth, another wealthy girl who is trying to win Peter, Sylvia Todd, Peter's model, and Gus Matson, his former roommate with whom he has quarrelled. After a party at an exclusive club, where the rest of the members of the party go to a cabaret to continue the party, Peter and Camilla slip off to the beach by themselves and make love on the sand. When they awake it is early morning and Avis and another boy are standing near them. This makes it necessary for Camilla to announce before the party that she and Peter are married. Camilla urges Peter to accept some of her earnings to help him along, but Peter refuses and tells her to go. Camilla has gone from the studio. Avis Werth calls and persuades Peter to accept a loan of \$10,000. Peter finances his exhibit and takes Camilla for suggestions as to a name for it. Camilla suggests "Eager Youth" and Avis suggests "The Youth" and Peter adopts the latter title and Camilla, heartbroken, leaves Peter to go quiet and to think. Peter and Avis follow him to the studio and lights are turned on, see the statue has been shattered to pieces. Avis accuses Camilla of doing this, and Camilla, stunned by the disaster, and hurt and horrified by the artist's faints.

At Camilla's suggestion, Peter enters as his exhibit a statue he has sculptured especially for her as a wedding gift. They marry and Peter is able to deliver his statue before the jury. Camilla's advertising campaign was a success from the beginning, and it was arranged to show the statue in the cast, in addition to newspaper advertising. Camilla to both write the story and to deliver the statue before the jury.

Peter's exhibit was awarded the Paris scholarship, and he prepares for his journey to France.

(Now Go On With The Story)

## CHAPTER LIV.

That was the shortest two weeks in Camilla's whole life, during which Peter made hasty preparations for going to Paris. He had so many people to see, so many were eager to honor him personally, that he had to attend to, adjustments to make in his routine life, that she couldn't see him half as much as she wished. Her own work, now so long and multiplied, added to the difficulty; and it seemed to her as if their hours together were so long and multiplied that she could not find time for greetings and farewells, plans and occasional wistful moments of despair over so long a separation.

"Perhaps," she had a sudden idea one day, "if I continue to make so much money and get my work arranged in advance, I can find time to see you for a little vacation in the spring." Her eyes shone with anticipation in the first joyous moment she had known since the beginning of the whole chaotic affair. "Paris is superb in the springtime, darling. Wouldn't that be wonderful?"

"Sure would," he agreed, his own spirits rising. "Well, a six months' sentence instead of a year. That helps some."

To which vague reprieve they clung hopefully, trying to convince themselves that six months really wasn't a long time at all when people were so busy and interested in life as they were. So, six months is not a long time in which to be busy; but it is as a century of time, waiting for love.

Peter moved his most valued possessions into Camilla's apartment. How she would treasure the night when he was in her absence, what poignant memories of their brief acquaintance they would recall.

"Having them here will be heaps of comfort," she told him.

"Well, say, if a few pictures and books and things can take my place, there will be no need of my coming back," he attempted to be gay.

She rebuked him lovingly. "Peter,

IT'S LIVER THAT MAKES YOU FEEL SO WRETCHED

Wake up your Liver

No Calomel necessary

For you to feel healthy, happy, free from those terrible liver troubles, you must have a good liver.

For the liver is the great internal organ of the body. It is the liver that makes the blood, and it is the liver that filters out the poisons from the blood.

It is the liver that makes the bile, and it is the liver that filters out the poisons from the bile.

It is the liver that makes the gall, and it is the liver that filters out the poisons from the gall.

It is the liver that makes the urine, and it is the liver that filters out the poisons from the urine.

It is the liver that makes the sweat, and it is the liver that filters out the poisons from the sweat.

It is the liver that makes the tears, and it is the liver that filters out the poisons from the tears.

It is the liver that makes the blood, and it is the liver that filters out the poisons from the blood.

It is the liver that makes the bile, and it is the liver that filters out the poisons from the bile.

It is the liver that makes the gall, and it is the liver that filters out the poisons from the gall.

It is the liver that makes the urine, and it is the liver that filters out the poisons from the urine.

It is the liver that makes the sweat, and it is the liver that filters out the poisons from the sweat.

It is the liver that makes the tears, and it is the liver that filters out the poisons from the tears.

It is the liver that makes the blood, and it is the liver that filters out the poisons from the blood.

It is the liver that makes the bile, and it is the liver that filters out the poisons from the bile.

It is the liver that makes the gall, and it is the liver that filters out the poisons from the gall.

It is the liver that makes the urine, and it is the liver that filters out the poisons from the urine.

It is the liver that makes the sweat, and it is the liver that filters out the poisons from the sweat.

It is the liver that makes the tears, and it is the liver that filters out the poisons from the tears.

It is the liver that makes the blood, and it is the liver that filters out the poisons from the blood.

It is the liver that makes the bile, and it is the liver that filters out the poisons from the bile.

It is the liver that makes the gall, and it is the liver that filters out the poisons from the gall.

It is the liver that makes the urine, and it is the liver that filters out the poisons from the urine.

It is the liver that makes the sweat, and it is the liver that filters out the poisons from the sweat.

It is the liver that makes the tears, and it is the liver that filters out the poisons from the tears.

It is the liver that makes the blood, and it is the liver that filters out the poisons from the blood.

It is the liver that makes the bile, and it is the liver that filters out the poisons from the bile.

It is the liver that makes the gall, and it is the liver that filters out the poisons from the gall.

It is the liver that makes the urine, and it is the liver that filters out the poisons from the urine.

It is the liver that makes the sweat, and it is the liver that filters out the poisons from the sweat.

It is the liver that makes the tears, and it is the liver that filters out the poisons from the tears.

It is the liver that makes the blood, and it is the liver that filters out the poisons from the blood.

It is the liver that makes the bile, and it is the liver that filters out the poisons from the bile.

It is the liver that makes the gall, and it is the liver that filters out the poisons from the gall.

It is the liver that makes the urine, and it is the liver that filters out the poisons from the urine.

It is the liver that makes the sweat, and it is the liver that filters out the poisons from the sweat.

It is the liver that makes the tears, and it is the liver that filters out the poisons from the tears.

It is the liver that makes the blood, and it is the liver that filters out the poisons from the blood.

It is the liver that makes the bile, and it is the liver that filters out the poisons from the bile.

It is the liver that makes the gall, and it is the liver that filters out the poisons from the gall.

It is the liver that makes the urine, and it is the liver that filters out the poisons from the urine.

It is the liver that makes the sweat, and it is the liver that filters out the poisons from the sweat.

It is the liver that makes the tears, and it is the liver that filters out the poisons from the tears.

It is the liver that makes the blood, and it is the liver that filters out the poisons from the blood.

It is the liver that makes the bile, and it is the liver that filters out the poisons from the bile.

It is the liver that makes the gall, and it is the liver that filters out the poisons from the gall.

It is the liver that makes the urine, and it is the liver that filters out the poisons from the urine.

It is the liver that makes the sweat, and it is the liver that filters out the poisons from the sweat.

It is the liver that makes the tears, and it is the liver that filters out the poisons from the tears.

It is the liver that makes the blood, and it is the liver that filters out the poisons from the blood.

It is the liver that makes the bile, and it is the liver that filters out the poisons from the bile.

It is the liver that makes the gall, and it is the liver that filters out the poisons from the gall.

It is the liver that makes the urine, and it is the liver that filters out the poisons from the urine.

It is the liver that makes the sweat, and it is the liver that filters out the poisons from the sweat.

It is the liver that makes the tears, and it is the liver that filters out the poisons from the tears.

It is the liver that makes the blood, and it is the liver that filters out the poisons from the blood.

It is the liver that makes the bile, and it is the liver that filters out the poisons from the bile.

It is the liver that makes the gall, and it is the liver that filters out the poisons from the gall.

It is the liver that makes the urine, and it is the liver that filters out the poisons from the urine.

It is the liver that makes the sweat, and it is the liver that filters out the poisons from the sweat.

It is the liver that makes the tears, and it is the liver that filters out the poisons from the tears.

It is the liver that makes the blood, and it is the liver that filters out the poisons from the blood.

It is the liver that makes the bile, and it is the liver that filters out the poisons from the bile.

It is the liver that makes the gall, and it is the liver that filters out the poisons from the gall.

It is the liver that makes the urine, and it is the liver that filters out the poisons from the urine.

It is the liver that makes the sweat, and it is the liver that filters out the poisons from the sweat.

It is the liver that makes the tears, and it is the liver that filters out the poisons from the tears.

It is the liver that makes the blood, and it is the liver that filters out the poisons from the blood.

It is the liver that makes the bile, and it is the liver that filters out the poisons from the bile.

It is the liver that makes the gall, and it is the liver that filters out the poisons from the gall.

It is the liver that makes the urine, and it is the liver that filters out the poisons from the urine.

It is the liver that makes the sweat, and it is the liver that filters out the poisons from the sweat.

It is the liver that makes the tears, and it is the liver that filters out the poisons from the tears.

It is the liver that makes the blood, and it is the liver that filters out the poisons from the blood.

It is the liver that makes the bile, and it is the liver that filters out the poisons from the bile.

It is the liver that makes the gall, and it is the liver that filters out the poisons from the gall.

It is the liver that makes the urine, and it is the liver that filters out the poisons from the urine.

It is the liver that makes the sweat, and it is the liver that filters out the poisons from the sweat.

It is the liver that makes the tears, and it is the liver that filters out the poisons from the tears.

It is the liver that makes the blood, and it is the liver that filters out the poisons from the blood.

It is the liver that makes the bile, and it is the liver that filters out the poisons from the bile.

It is the liver that makes the gall, and it is the liver that filters out the poisons from the gall.

It is the liver that makes the urine, and it is the liver that filters out the poisons from the urine.

It is the liver that makes the sweat, and it is the liver that filters out the poisons from the sweat.

## TOWN &amp; COUNTY

Personalography

Mrs. T. B. Olive arrived in Carbon last week from Winnipeg to join her husband here.

Mr. and Mrs. Adam Bertsch made a trip to Swatow on Wednesday of this week.

Fred Poxon unloaded a car of twine on Tuesday. Twine prices are 16.50 at Carbon this year.

A U.F.A. Rally will be held in the hall at Delisle on Tuesday afternoon and evening, August 14th. A cordial invitation is extended to every U.F.A. member and to all farmers interested. A number of excellent speakers will address the rally.

Mr. and Mrs. Schulte arrived last Sunday and spent a few days visiting with Mr. and Mrs. Otto Schulte.

Mr. Adam Bertsch and Mr. Otto Ottel, together with Mr. and Mrs. H. N. Elliott, returned to Drumheller on Sunday evening to visit with Mr. W. Williamson at the hospital. Mr. W. Williamson is reported to be progressing favorably following his operation.

The Rochester Sunday matinee, commencing 2:30 p.m., will feature Scott J. Mueller and Co. Patricia, who were touring Alberta, sang at both the Presidential and Delisle German Baptist churches south of Carbon on Sunday.

Mr. and Mrs. Klussen of Herbert, Sask., arrived on Monday and are visiting with their son and daughter-in-law, Mr. and Mrs. Aaron Klussen.

Mr. Otto Ottel returned to Calgary on Wednesday after spending a few days visiting with Mr. and Mrs. Adam Bertsch.

Mr. and Mrs. R. J. Petrucci and family of Calgary are spending a short holiday with friends in Carbon.

Mr. and Mrs. Clayton Day and family of Driskell left on Monday for their home after spending a week's holiday with Mr. and Mrs. A. Hay.

Mr. and Mrs. Harley Davidson left on Wednesday to spend a couple of weeks with Mr. and Mrs. S. Winfield at Bonaville, Alberta.

**Remember!** When the next printing salesman walks into your office and asks you for a printing order, tell him that there is a printer in town and that he CAN do that particular job.

Mr. and Mrs. Aaron Klussen spent Sunday visiting in Driskell with Mr. and Mrs. Barney Klussen.

Mrs. W. Poxon was a business visitor in Calgary on Monday.

John Jacob Astor and his bride have decided to extend their honeymoon tour to the Canadian Rockies and British Columbia. "We intend to stop over at Lake Louise," said the young millionaire, "and then move on to Vancouver, taking in the sights on the way."

Captain R. G. Latta, skipper of the liner Empress of Britain and commodore of the Canadian Pacific fleet, retired from active duty recently. He was succeeded on the bridge of the Britain by Captain R. N. Stuart, V.C., D.S.O., U.S.N., R.D., R.N.R. Captain Stuart was promoted to the post of commodore of the Canadian Pacific fleet.

Indicating the trend towards greater production and recovery of business, substantial increase in the second quarter of 1934 as compared with the corresponding period of 1933 is shown in the recently published production figures of Consolidated Mining and Smelting, one of the world's greatest mining companies.

Driving a highly decorated locomotive into the Canadian Pacific Railway depot at the end of the Calgary-Edmonton run recently, A. N. Hobbirk, veteran engineer, completed 25 years of continuous service with the railway, most of it at the throttle of an engine. "I have always liked my work and I hate to quit," said Mr. Hobbirk.

Founded June 18, 1874, by George and Mathew Beatty and with branches, warehouses, offices or depots across Canada, New Zealand, the United Kingdom and fifty other countries, the national and world-wide exporting house of Beatty Bros. manufacturers of washing machines and farm implements, celebrated its Diamond Jubilee at Pergus, Ont., last month.

John P. Sweeting, industrial commissioner of the Canadian Pacific Railway, states in an official publication of the railway that there is a decidedly firm state of confidence in the West and increased activity in many industries with the result that business prospects for the future are all bright and clear.

An increase of \$7,500,000 in the Nova Scotia railway catch during the month of May was announced by the head office of the railway in Montreal, in 1934, according to an announcement by the Department of Finance on June 25th.

## CHEVROLET

Now, as Always  
**OUT IN FRONT**  
Leading in Sales and Values

FULLY-ENCLOSED KNEE-ACTION • CABLE-CONTROLLED BRAKES

YK FRAME • SHOCK-PROOF STEERING • BUILT-IN NO-DRAFT

VENTILATION • BLUE-FLAME CYLINDER HEAD • SAFETY

GLASS WINDSHIELD &amp; VENTILATORS • STURDY, SMART BODY

BY FISHER • OCTANE SELECTOR • WIRED FOR RADIO

**YEAR** after year, it has been the same story: Chevrolet first... with the newest and best. Chevrolet leading, others following!

And 1934 is no exception. Again, the biggest engineering achievements in the low-price field are Chevrolet achievements: Fully Enclosed Knee-Action... changing your ride to a glider! Blue Flame Cylinder Head... giving more power and "snap", yet using less gasoline than ever! Fisher Streamlined Design... the most popular motor car styling in Canada! Cable-Controlled Brakes... self-equalizing, bigger, sealed against dirt and

moisture! Fisher No-Draft Ventilation... refined and improved! "YK" Frame... stronger than any other in its class.

Make sure you get a modern, 1934 automobile for your money... a new CHEVROLET, Canada's Great Sales Leader!
